

Datahive Cloud Backup

Simple Offsite Backup for MSP's

Datahive has been reliably protecting data for over 15 years, with a successful partner program tailored specifically to MSP's. Reduce the cost and complexity of providing backup, without the need to sacrifice speed or reliability.

MSP features at a glance:

- **Only UK Datacentres, only our own equipment** – Data never leaves UK shores, so your customers can confidently comply with any regulatory requirements.
- **No joining fee** - No minimum spend and we don't dictate your margins.
- **Easy Monthly Pricing** – Simple pay-as-you-use model, scales with your business.
- **Unlimited UK Support** – Responsive, expert, UK-only support team.
- **ISO27001 and ISO9001 accredited** – providing utmost confidence in our services.
- **Full control** – All encryption keys are retained by yourself or the customer, we never have access to your customer's data.

Centralised Backup Management

All MSP partners receive free access to a centralised platform that allows:

- Self Service Customer Provisioning
- Centralised Backup Reporting
- Backup Set Modification
- Rebranding Options

Datahive Cloud Backup

Simple Offsite Backup for MSP's

Technical features at a glance:

- **AES256 Military Grade Encryption** - all data is encrypted before upload using a truly randomized 256-bit full length AES encryption key. Only the customer retains the key.
- **Compression and Deduplication** - Our high-performance compression and dedupe engines equals faster backups and smaller storage requirements.
- **In File Delta** - Block level delta generation, meaning only the incremental changes to data are uploaded.
- **Simple and Flexible Retention Policy** - Keep unlimited historical versions of your data and easily restore data from any point in time.
- **Reliability** - Built in CRC data integrity checking, verification and rectification means your backed up data is always ready to be reliably restored.
- **Ransomware Protection** - 2FA protection means the backup data is secure and not accessible via malicious actors.
- **Seed Loads** - Overcome poor connections by transferring initial backups on USB drive. In case of a disaster, receive all backup data back in one go on a USB.

Easy to use OBM client
